

# Rodent Prevention and Control

Everyone has a role in rodent prevention. Rodent proofing your home and property is the most important factor to prevent and control these pests.

Pest control on private property is the **owner's responsibility**

**The Town of Riverview  
DOES NOT SUPPLY TRAPS**

Please visit [townofriverview.ca/rodentcontrol](http://townofriverview.ca/rodentcontrol) for tips on trapping and disposal.

[townofriverview.ca](http://townofriverview.ca)

Rodents look for **FOOD, WATER** and **SHELTER**.  
By eliminating their access, rodents should stay away from your property:

- 1 Ensure compost bins and garbage bins are securely covered.
- 2 Do not install bird feeders where rodents can reach them, including in trees (rats are good climbers).
- 3 Remove fallen fruit, nuts and vegetables from the ground.

- 4 Limit the amount of standing water in your outdoor space. 
- 5 Ensure all structures are sealed.
- 6 Keep shrubbery trimmed and cut back from the house.
- 7 Keep your lawn trimmed.
